

Iceland photography

Hej alla Lightroomare och islänningar! Lite inspiration för eventuell resa till Island kanske. Och jag tror den här länken jag fått till gratis video fungerar för er också. Trevlig kille!
 Mvh//Stefan 070-219 05 75

During the summer months, the landscapes of Iceland come alive with wildflowers, waterfalls flow abundantly, and the Icelandic moss once again takes on a lush shade of green. It's the best time for spotting wildlife, including Arctic foxes, Icelandic horses, sheep roaming free, and of course, the cutest birds in the world, puffins.

Laugavegur Trail

The hiking trail between Landmannalaugar and Þórsmörk is one of the most popular hiking trails in Iceland. National Geographic listed it as one of the most beautiful trails in the world. It is unusual to find so much variety in the landscape. The trail goes through incredibly colourful rhyolite mountains, black obsidian lava, wheezing hot springs, lakes clear as a mirror, black sandy desert and ends in a lush forested area.

Fagradalsfjall

is not erupting since some months, I would now suggest you not to go there.

It seems to me that you chose 2 random locations in Iceland, like Hekla and Myrdalsjökul; I mean, they are beautiful:

<https://www.fi.is/en/hiking-trails/trails/laugavegur>

but I could mention many other glaciers and mountains in Iceland:
